This image contains a page from the GEOTAIL EPIC document. It includes plots of various data such as ICS Flux, STICS Count Rate, and STICS Count Rate (s^-1). The plots show different energy levels and species distributions over time. The data is plotted against UT and GSM coordinates, with specific values given for X_GSM, Y_GSM(GSE), and Z_GSM(GSE) at different UT times. The data is also categorized by different species and energy levels, such as BR1 O&NO, HR0 H+, and HE2 He+. The document is dated Nov 5, 2004, and the plots were created using Plotting S/W Version: 3.81 on Thu Nov 11 19:52 2004.
