The image contains a plot of magnetic field components in the GSM coordinate system for March 11, 2005. The plot shows the evolution of magnetic field components (Bx, By, Bz) in nanoteslas (nT), magnetic field strength (B Total) in nT, and magnetic field latitude (B Lat) and longitude (B Long) in degrees, as well as dB in nT. The data is presented in a UT (Universal Time) format from 0000 to 1200 hours. The table below the plot lists the values for X_GSM, Y_GSM(GSE), Z_GSM(GSE) in nanometers and the corresponding UT times in hours.
